

## PackTiger®

Paper Cushioning System

The Best  
Choice  
for Protective  
Paper  
Packaging

## CREATE PAPER PACKAGING AT UNMATCHED SPEEDS

The PackTiger® paper packaging system from Sealed Air capitalises on Swiss design and engineering, to create custom-length paper pads, at speeds up to 150 per minute. These can be used in a variety of packaging techniques, including cushioning, and blocking and bracing.

## PUSH-BUTTON OPERATION AND EASY LOADING

The PackTiger® system features an easy-to-use control panel that stores up to 24 custom pad configurations. In manual mode, creating pads is as simple as pushing a button or foot pedal. The PackTiger® system can also be run in automatic mode, using easy, one-touch access buttons for frequently-used pad configurations. The bottom-loading design creates fast material changeovers, getting you up and running in no time.

## EFFORTLESSLY INTEGRATES INTO YOUR CURRENT OPERATION

The PackTiger® system allows you to seamlessly integrate it into your current packaging operation with ease. The system is ideal for workstations, as PackTiger® material can be used straight from the system or batched into bins. Options such as a foot pedal and remote keypad make the PackTiger® system suitable for online operation as well. At half the weight and footprint of traditional paper packaging systems, the portable PackTiger® system is easy to position anywhere.

# Fast, easy, reliable paper cushioning

## THE SEALED AIR ADVANTAGE

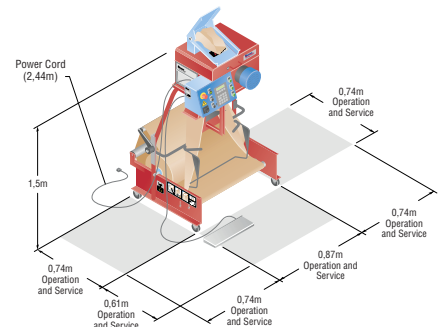

The PackTiger® system provides something no other paper system can match: the peace of mind that comes with selecting a rugged and dependable Sealed Air packaging system. The PackTiger® system requires minimal service and is built to last, delivering greater uptime and a more profitable packaging operation.

## SEALED AIR SUSTAINABILITY

PackTiger® paper is made from 100% recycled fibres (85% post-industrial, 15% post-consumer). It can be easily reused or recycled in mixed paper streams. The patented, single-motor design reduces power consumption and conserves energy. The loft design of PackTiger® material delivers superior protective performance using less material.

## SPECIFICATIONS

**Weight (without material)**  
118 Kg  
**Overall Size (L x W x H)**  
87cm x 74cm x 150cm  
**Electrical**  
220-240 V ~ Single Phase  
7A, 50 Hz
