Fill-Air Cyclone®

Inflatable Packaging System

Fill-Air Cyclone® meets the most rigorous, high-volume packaging challenges without giving up valuable floor space

Fill-Air Cyclone® System

The speed you need to feed your high-throughput environments

Tiny footprint, enormous production

The Fill-Air Cyclone® inflatable packaging system produces 20 metres of inflatable void fill cushions per minute in a variety of sizes – fast enough to keep up with the most demanding packaging operations. The

small footprint gives you the flexibility to use the Fill-Air Cyclone® system on demand in decentralised tabletop environments, or online for increased efficiency.

Ready to work right out of the box

With the Fill-Air Cyclone® system, installation is a breeze. The simple yet sophisticated design requires minimal training. The system is shipped in a small carton, and simply needs to be plugged in and loaded

with film to begin making packaging material. No shop air is required!

Compact design saves valuable floor space

The Fill-Air Cyclone® has a compact footprint (less than 0.13m²) that makes it ideal for tabletop placement at a pack station. Push-button

operation allows material to be created on demand. Material can also be batched into bins for use at satellite packaging stations. An auto-replenishment sensor can be implemented to maintain a consistent supply of material at all times.

Choose from eight cushion sizes

Fill-Air Cyclone® film is available in four film widths and can be converted to two different cushion

lengths, creating eight possible cushion sizes; the largest measures 350 x 200mm.

200 x 130mm	250 x 130mm	300 x 130mm	350 x 130mm
200 x 200mm	250 x 200mm	300 x 200mm	350 x 200mm

Responsible packaging from the worldwide leader

Sealed Air is committed to providing solutions to our customers' environmental challenges in a reliable, cost-effective and responsible manner. Because Fill-Air® material inflates on-site, it takes up a fraction of the truck space needed to ship conventional packaging materials, greatly reducing the transportation impact.

Specifications

Electrical:

220 - 240 V Single Phase
1.0 A 50/60 Hz

Weight (without roll):
17 kg.

Overall Size with roll
(W x D x H):
521mm x 432mm x 470mm

Protective Packaging
Telford Way, Kettering, Northants NN16 8UN, UK
